Average learning outcomes by total education expenditure per capita

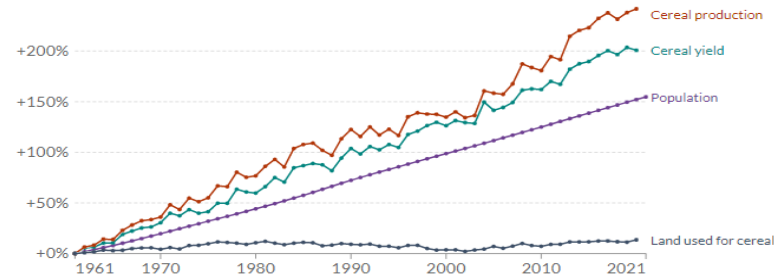

In order to maximize coverage, the most recent available data were used for both the learning outcomes (2005-2015) and expenditure data (2012-2016). National average learning outcomes correspond to test scores across standardised, psychometrically-robust international and regional student achievement tests. Total education expenditure encompasses both governmental and household spending on education.

in cereal production, yield and land use, World, 1961 to

and cereal production, yield and land use figures are indexed to the year 1961 (i.e. 1961 = 0).
